EKSTAM'S FUEL PREPORATOR® MAKES NATIONAL TV APPEARANCE

COLUMBIA, Mo. – The Fuel Preporator® will be featured on the Outdoor Channel's program "Pleasure Boater" at 6 a.m. Monday, July 26, 2 a.m. Thursday, July 29, and 2 p.m. Sunday, Aug. 1, according to the producers of the show.

According to Masters Entertainment Group's Bearl Jenkins, producer of the program, the show will highlight the efficiency and environmental benefits of the new technology for boating enthusiasts. The Fuel Preporator®, which received a patent last month, is a new environmental technology that may revolutionize diesel engines and decrease pollution around the world

The innovator in air and vapor elimination from industrial fluids, Ekstam Worldwide developed the Fuel Preporator® in mid-Missouri. The Fuel Preporator® is a fuel supply system for diesel engines that removes air and vapor from the fuel supply. Removing the air vapor increases diesel engine efficiency by 8 percent or more, saving the operator money in fuel costs and substantially reducing harmful exhaust emissions while increasing torque output of the engine.

"It is great to appear on 'Pleasure Boater' and to receive such national attention," said Charles L. Ekstam, who invented the technology. "The Fuel Preporator® has the potential to change the diesel industry from top to bottom, and it will help boat owners get more out of their engines."

Ekstam Worldwide is based in Jefferson City, and its manufacturer is Knernshield Manufacturing Co. in Columbia. Ekstam offers a full line of Preporator® products for diesel vehicles, including light and heavy trucks, construction equipment, forklifts, locomotives and tugboats.

The Fuel Preporator® technology has been fully tested in laboratories at the

University of Illinois, West Virginia University and the Milwaukee School of Engineering, along with mining corporations and a number of trucking companies. Reductions in hydrocarbons ranging between 22 and 77 percent and a reduction of NO_x gases by as much as 46 percent have been obtained.

--more--

The company's Fuel Preparator[®] 80, known as the "Air Dog," built for small diesel engine automobiles, made its debut May 15 on the Speed Channel program, "Two Guys Garage."

An ISO-9001 quality manufactured product, the Fuel Preparator[®] has been approved for sale in all 50 states, including California, where it was approved for sale and use by the California Air Resources Board.

Ekstam Worldwide is the sole international licensee of the Fuel Preparator[®] product line, which includes the "Air Dog" FP80, for diesel automobiles and pick-ups; the FP135, for bulldozers, construction equipment and generators; the FP135A, for Class A Trucks; the FP450 and FP 650 for larger diesel engines in power plants and on tugboats and locomotives; and other products.
